Hello Ardis

I believe this is the letter you are looking for. I don't think you've missed many letters; there have not been very many comment letters since the ST12 pilot study got underway. Likely there will be though in the coming months as final reports are coming in I will make sure to add both you and Bill on the ccs.

Subject: Williams EPA Letter dated 12/12/18

Hi Carolyn

I hope all is going well. Thank you for putting me back on email distribution for your letters. I still do the electronic filing. I have a request.

I was looking through our AR and saw mention in another document of an EPA comment letter dated 12/12/18 on "ST012 Remedial Action Field Variance Memorandum 6 – Pilot Study Supplemental Data and Evaluation Metrics and ST012 Remedial Action Field Variance Memorandum 7 – Pilot Study Implementation – Injection-Extraction Modifications". I don't have that one. Would you send to me? Thanks!

When we have "intermittent email issues", which happens more often than it should, sometimes emails just drop into a cyberspace and we never see them again. I'd wonder where they go but it would probably drive me crazy. ☺
